# C14 Cold Storage

The world's first alternative to S3 Glacier.

## Included Services

-  Compatible With S3 Tools
-  Free Archiving
-  75 GB Free
-  Free Restoration
-  Full Lifecycle Management
-  Strong Data Protection
-  Unlimited Volume
-  24/7 Ticket Support

**Protocol**  
S3-compatible API

**Ultimate storage location**  
Fallout shelter 25 m underground

**Storage type**  
Shingled magnetic recording disks

**Data availability**  
99.99 %

**Data durability**  
99.999999999%

**Data protection**  
Erasure coding 6+3

**Restoration time**  
Usually a few minutes

Available in:  Paris underground databunker

## Use Cases

### ✓ Ultra HD Media Files

C14 Cold Storage is perfect for storing large media files that do not require instant access. It can be 4K or 8K ultra high definition footage or raw image datasets. You can integrate C14 Cold Storage into your infrastructure so that files are restored on-demand on Object Storage's standard class. They can be easily downloaded then.

### ✓ Heavy Logs & Backups

Automatically archive your logs and backups to C14 Cold storage stored on Object Storage with S3 lifecycle management features. This allows you to keep them at a minimal cost and recover them when needed. You can also define an expiration date at which your archived data will be deleted.

### ✓ Legal Archives

C14 Cold storage allows you to archive highly restricted legal documents required by the law. For example, documents like contracts, accounting data, administrative documents or access logs. Some of these documents must be archived to comply with GDPR and other local regulations.

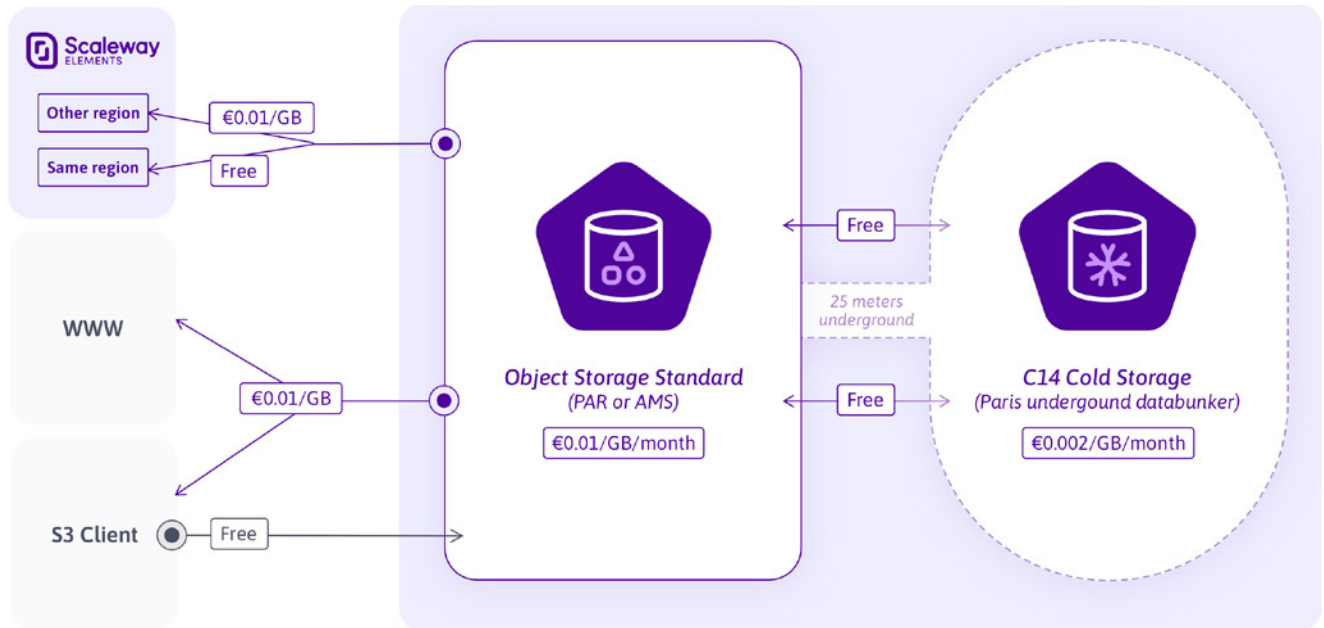

**Frames Dealer stores premium footages on C14 Cold Storage**

*"We use and love Scaleway products for their Developer Experience and their very competitive pricing. We already are planning to expand our platform within the next few months with Scaleway"* Antony De Lopez Vallerie, Architect at Frames Dealer

## Product Lifecycle

Archive your data in our databunker in Paris with the C14 Cold Storage archiving service. Directly integrated into our Object Storage through a storage class called Glacier, C14 Cold Storage perfectly integrates lifecycle management features. 75GB of storage is free-of-charge each month, additional storage capacity is billed €0.002/GB/month. Archiving from the Standard Object Storage class and restoring your data are completely free of charge.

## Our Strengths

### ✓ S3-Compatible Cold Storage

C14 Cold Storage is the world's first alternative S3 Glacier. This cold storage is fully integrated into our S3-compatible Object Storage, which lets you archive and restore your data from the console or any S3 tool and software: Cyberduck, Duplicity, Rclone, S3cmd...

### ✓ Underground Databunker

C14 Cold Storage data is stored in an ultra high security nuclear fallout shelter located in Paris 25 meters deep below the surface. It is totally secure and is isolated from all natural and technological risks while benefiting from significant network capacities.

### ✓ Free Archiving & Restoration

C14 Cold Storage lets you archive and restore your data from Object Storage's standard class at no cost. This can be done manually or through the S3 lifecycle management features.
