- Over 2,800m² of customer space
- PUE of 1.47 TTM
- 100% powered by renewable energy
- 100% uptime SLA
- Interconnections with all major international Telcos and IX operators
- 24/7 on-site security and technical support team
Facility

- Total surface area: 5,500m²
- Fit out: turn-key
- Floor type: raised
- Floor load capacity: 1.5 ton per m²

Power

- Utility feeders: 2x9 MW
- UPS configuration: parallel redundant & distributed redundant
- UPS redundancy: N+1 & N
- UPS power distribution: N+1 & 2N
- Backup power: Standby rated low-voltage diesel engine generators
- Backup power redundancy: N+1 - catcher
- Fuel autonomy: 50 hours at full load fully-rated
- Power consumption: circuit-based

Cooling

- Cooling power: 5 MWf
- Cooling technology: chilled water system
- Cooling redundancy: N+1 (Plant and CRAC)
- Cooling distribution: loop
- Containment: cold aisle
- PUE: 1.48 TTM

Security

Access

- Secured gate
- 2.5m high perimeter fence and controlled site access
- Man trap
- Key cards and biometric scanners
- Secured loading dock

Security staff

- 24/7 on-site security presence

Cameras

- Perimeter and interior CCTV

Fire protection

- Detection: DFHS multipoint system from DEF
- Suppression: Semco water mist FM, VdS/OH1 and DIFT certified system

Connectivity

- Carrier neutral data center
- More than 30 international operators available on site
- Access to major IX
- Satellite dish roof space
- MMR and Telco room

Deployments & Services

- Cabinet, cold aisle corridors, cages and private suites
- 24/7 Remote Hands services
- On-site build & storage room
- Secure on-site parking
- Managed office
- Meeting room

Certifications

- ISO 27001:2013
- ISO 50001:2018
- HDS 1
- Code of Conduct
- APSAD
